

Introducing the innovative BevGuard™ water filter. An affordable product developed specifically for the beverage and food service industry which provide an economical alternative to the expensive 3M™/Cuno® or AquaPure™ replacement filters.

Since water is the key component of the beverages that you dispense, water quality is surely a key consideration in your beverage equipment strategy. This means having a filter that provides superior performance is important.

BevGuard water filters meet or exceed the performance of the 3M™/Cuno® or AquaPure™ replacement filters.

BevGuard™ water filters can be used in any 3M™/Cuno® or AquaPure™ filtration system...

- As a single filter cartridge system encapsulated in a plastic housing.
- As a multi stage filter system for high flow equipment applications.

This filter should not be used with water that is microbiologically unsafe or of unknown quality, without adequate disinfection before and or after the filter.

BevGuard™ filters have been tested by the manufacturer against ANSI/NSF Standard 42 for materials requirements only.

Its inclusion in the filtration process will comprehensively satisfy all your beverage filtration requirements and it will do so cost-effectively.
